

SYSTEMS DIRECTLY ENGAGED IN EDUCATION

On these pages, Oregon education service districts (ESDs) and school districts (SDs) are listed alphabetically by county, with some staff members by name and position. Figures in parentheses after each school district represent the FTE of total certificated staff for the **previous** school year; the next figure represents total student enrollment (head count) reported October 2006. Figures with each school represent total student enrollment at the school and grade levels reported by the school district. School student enrollment totals may not add up to the listed total district student enrollment because of alternative schools and special education schools not listed under the district heading. You can find more enrollment information at www.ode.state.or.us.

Example of School District Information:

(131) total certificated staff
2,007 total (district) student enrollment
